

SIMPLE MACHINES

PART 1

Task:

Using a camera or device capable of taking photos, go for a wander around the house or school.

Find and take a photo of:

- 3 examples of an inclined plane
- 3 examples of a lever
- 3 examples of a wheel and axle (not pics of 3 different cars!)

Download the images and use them to create a poster collage with all 3 example of each of the three simple machines we explored today.

Label each image with what it is and where it was found.

Also annotate your images:

- Inclined planes, arrow label the inclined plane
- levers, arrow label the arm and the fulcrum
- wheel and axle, arrow label the wheel and the axle.

Students at school you can do this task in teams of no more than **THREE** people.

Students at school to hand their posters to the relief teacher
students at home please take a photo and email it to me.
